About 1801, 1 Aug 16, SA (b)(6)(b)(7)(C) briefed (b)(6)(b)(7)(C) Military Magistrate, Office of the Staff Judge Advocate (OSJA), RSAAL, on the preliminary aspects of this investigation and requested a Search Authorization for the digital media obtained at the residence. (b)(6)(b)(7)(C) related there was no need for a search authorization for the government laptop or cellular telephone because MG(P) Rossi had no Reasonable Expectation Of Privacy (REOP) given the circumstances. Additionally (b)(6)(b)(7)(C) stated there was no evidence of a crime; therefore, he could not give authorization to search the Rossi's personal desktop computer.

About 0900, 2 Aug 16, SA (b)(6)(b)(7)(C) and SA (b)(6)(b)(7)(C), Forensic Science Officer, 502D MP BN (CID), Fort Campbell, KY (ECKY), attended the autopsy of MG(P) Rossi, performed by (b)(6)(b)(7)(C) (b)(6)(b)(7)(C) JD MD, (b)(6)(b)(7)(C) Armed Forces Medical Examiner System (AFMES), Dover Air Force Base (AFB), DE 19902. preliminary cause and manner of death as hanging/suicide. Photographs were taken at the autopsy by SPC (b)(6)(b)(7)(C) AFMES, Dover AFB, DE 19902.

Between 1440 and 1446, 2 Aug 16, SA (b)(6)(b)(7)(C) collected a Blackberry cellular telephone, a DVD and a Hard Disk Drive (HDD) from (b)(6)(b)(7)(C) SMDC, RSAAL, as evidence, which was documented on EPCD, DN 016-16.

Agent's Comment: The cellular telephone was reportedly issued to MG(P) Rossi when he in-processed RSAAL and after around two days he provided it to (b)(6)(b)(7)(C) Transition Aide, SMDC, RSAAL. (b)(6)(b)(7)(C) stated he received the HDD and DVD from (b)(6)(b)(7)(C) (NFI) at SMDC, RSAAL, who related they were used by MG(P) Rossi. 9. (b)(6)(b)(7)(C), WANT TO MAKE THE FOLLOWING STATEMENT UNDER OATH: On 31 July 2016 at approximately 1300 hours I was on routine patrol on Redstone Arsenal. I heard Redstone dispatch attempt to page out fire department over the Police frequency to 6 Wadsworth for a unknown medical call. I advised dispatch she was on Police frequency and turned my vehicle around to go to the address. Prior to arrival, the call was updated to a possible suicide with unknown weapons. Upon arrival at the address I went past the residence to observe any activity. I saw A black female standing by front door with a telephone to her ear, this female also "waved me over". I met with the female and was instructed into the house where a black male led me to the master bedroom and then into the master bathroom and into the master walk in closet. (b)(6)(b)(7)(C)			
(b)(6)(b)(7)(C) There was also a brown soft type long gun case partially on victims lap on the left side of legs. On right side of victim's lap there appeared to be a Army dress jacket. I checked for a pulse on the victims neck and could not find one. I also placed my hand close to victim's mouth and nose to see if any breath could be felt, I felt none.			
The fire department had by then arrived and staged until Police said it was safe to enter, they were advised that scene was safe and to come in. Redstone Fire entered closet area and checked victim for signs of life and ran an E.K.G. strip.			
(b)(6)(b)(7)(C) and his trainee had arrived and I instructed (b)(6)(b)(7)(C) to get his department camera and take a few quick photos. He went to his vehicle retrieved camera and returned and took a couple of photos while Redstone Fire was conducting there assessment (b)(6)(b)(7)(C)			
(b)(6)(b)(7)(C) arrived and contacted C.I.D. and advised them of the situation and to be on way to scene.

On 31 July 2016 at approximately 1300 hrs, (b)(6)(b)(7)(C) and I were dispatched to a medical call at 6 Wadsworth Drive. While en-route we received from Redstone Dispatch that the call was now a possible suicide and a weapon was mentioned. At approximately 1305 hrs (b)(6)(b)(7)(C) and I arrived to support (b)(6)(b)(7)(C) who was already inside with the deceased soldier. We made entry into the master bathroom closet to find the deceased (b)(6)(b)(7)(C) (b)(6)(b)(7)(C) Redstone Fire entered after (b)(6)(b)(7)(C) and I entered and the area was called clear and safe. I then went and retrieved my camera and took (2) photos of the scene while the Fire Department assessed the soldier. (b)(6)(b)(7)(C) and I stepped out of the bathroom and into the master bedroom to control the flow of personnel entering the area. A Crime Scene Log was started and I believe that it is accurate to the best of my knowledge. CID arrived at approximately 1500 hrs and began to process the scene. At approximately 1535 hrs, (b)(6)(b)(7)(C) and I were relocated to the entrance of Wadsworth Drive to deny access to non-residents and non-essential personnel. At 1606 hrs, (b)(6)(b)(7)(C) and I cleared the area en-route to the station. //// Nothing Follows ////

9. I, XXXXXXXXXXXXXXXXXXXXXXXXXXXXXXX, WANT TO MAKE THE FOLLOWING STATEMENT UNDER OATH:  
Investigator's Statement

This statement is intended to clarify and/ or elaborate on certain aspects of this investigation not elsewhere covered by documents and/ or statements.

(b)(6)(b)(7)(C) Sunday 31 July 2016 just before 1300 hrs Police were notified via radio of an unknown medical call at 6 Wadsworth Drive. Dispatch gave little to no detail, but informed us that Fire would be standing by in a safe location until cleared to respond to a safe scene. At approximately 1300 hrs I heard (b)(6)(b)(7)(C) call out at 6 Wadsworth Dr. (b)(6)(b)(7)(C) had already called out and requested a supervisor. When I arrived (about 10 minutes later) at the residence on Wadsworth I immediately observed that (b)(6)(b)(7)(C) were already at the residence. When I entered the residence I immediately observed a large group of firemen, I was directed through the entry area past the dinning room and I was shown a master bedroom off to the right hand side. when I entered the bedroom there were probably 5-7 firemen, and 3 HEMSI personnel (exiting). I then entered through an opened door on the left side of the Master Bedroom which was a connected Master Bathroom and had another 2-3 firemen in it. The last room attached to the Master Bathroom was a large walk-in closet. Standing at the door of the closet area was (b)(6)(b)(7)(C) who showed me why we were notified. (b)(6)(b)(7)(C)  
(b)(6)(b)(7)(C) The Male was identified to me as MG Rossi. MG Rossi I was informed by (b)(6)(b)(7)(C) RSAFD, that (b)(6)(b)(7)(C) had made contact with Huntsville Hospital and MG Rossi had been declared dead. (b)(6)(b)(7)(C) also informed me that he had touched MG Rossi to ensure there were no signs of life, and to check for an ID (only removing a folded piece of paper, which he placed on a dresser next to MG Rossi's body). Upon realizing that we were dealing with an undetermined manner of death I gave instruction to (b)(6)(b)(7)(C) and (b)(6)(b)(7)(C) to secure the crime scene, record names, and start removing everyone from the area. (b)(6)(b)(7)(C) secured the immediate area of the closet and Officers (b)(6)(b)(7)(C) pushed the crime scene area further out towards the entryway to the Master Bedroom. Once we secured the immediate area I exited the front door of the house and spent the next 20-30 minutes making notifications to my Chain of Command, and the Police Desk Sgt. I met with (b)(6)(b)(7)(C) next and spoke briefly with him about ensuring the crime scene was secure, notifying CID and seeing if he had any additional requests from the Police. Over the next Hour to Hour and a half I continued rotating my Officers through certain areas, and reorganizing officers on scene so I could have an officer available for a call if we needed one. At one point I walked back in on the crime scene (unknown time) to check on the police officers and observed (b)(6)(b)(7)(C) standing in the bathroom observing the condition of MG Rossi. I checked with (b)(6)(b)(7)(C) and asked how they got in to the crime scene and he told me that they walked past him, so he ensured they were logged in. at approximately 1530 hrs CID arrived and took control of the crime scene. From this point on I stayed at the residence to control the police officers at the scene, who were only responsible for the (b)(6)(b)(7)(C)

### 3. DETAILED FINDINGS:

a. **Exhibit 1:** An analysis of the Seagate 500GB SATA HDD removed from Exhibit 1 disclosed it contained a bitlocker encrypted volume. The provided recovery key “178057-577478-233519-469095-608432-132748-200211-270204” successfully decrypted the volume. Subsequent analysis disclosed it contained the Windows 7 Enterprise Operating System, and the registered owner and organization were “U.S. Army”. There were sixteen individual user profiles associated to the device; however for the purposes of this examination, only the “RossiJ” user profile was reviewed. The system was set to Central Standard Time (CDT), with Daylight Savings Time enabled, which was consistent with the known good local time.

(1) Analysis of the registry files identified the standard Department of Defense Information System banner was enabled.

(2) Analysis of the documents identified five documents accessed by the “RossiJ” user between 25 Jul 16 – 30 Jul 16. The documents appeared to pertain to a “PCS to-do list” along with versions of draft Change of Command and promotion speeches.

FOR OFFICIAL USE ONLY – LAW ENFORCEMENT SENSITIVE

(3) Additional analysis of the Offline Storage Table (.ost) file pertaining to the john.g.rossi2.mil@mail.mil email account as well as internet artifacts and remaining files associated to the "RossiJ" user profile did not identify anything of evidentiary value.

*Note: .ost files are part of the Microsoft Outlook email platform that allows users to utilize their email account in an "offline" mode.*

b. Exhibit 2: An analysis of the Western Digital 750GB SATA HDD removed from Exhibit 2 disclosed it contained the Windows 10 Home Operating System, and the registered owner was "john". There was one unique user profile account identified as "john", with a last logon date of 31 Jul 16. The system was set to Central Standard Time (CDT), with Daylight Savings Time enabled, which was consistent with the known good local time.

(1) Analysis of the internet artifacts identified the following:

(a) A timeline review of the web history from 29 – 31 Jul 16 identified 15 artifacts detailing the most recent internet activity on the device. The last Firefox web visit was conducted at 10:45am, 31 Jul 16, which pertained to the Mass Schedule of the Holy Spirit Catholic Church.

(b) Six artifacts pertaining to the most recent IE 10-11 Daily-Weekly History identified the most recent activity was on 30 Jul 16. The files were verified on the user's desktop and contained nothing relevant; however, are included to aid in establishing a timeline surrounding use.

(c) Eleven artifacts pertaining to the most recent "jumplists" identified the most recent activity was on 30 Jul 16 and contained nothing relevant; however are included to aid in establishing a timeline surrounding use.

*Note: Jumplists were artifacts introduced with the Windows 7 taskbar to give users quick access to recently accessed files/folders and actions.*

(d) All identified internet artifacts were exported into the Microsoft excel workbook "[IEF Analysis Report](#)" for review.

(2) Additional analysis did not identify anything of evidentiary value.

c. Exhibit 3: An analysis of Exhibit 3 disclosed the device was not password protected and placed into "airplane mode" upon receipt. The phone carrier was AT&T, and the phone number was identified as (580) 951-8194. As a result of the battery being removed from the device during the initial collection, the associated time/date reset to the factory default setting of 1 Jan 00:00, 1980. With the device being placed

FOR OFFICIAL USE ONLY – LAW ENFORCEMENT SENSITIVE

into "airplane mode" for examination, the device was unable to sync with a cellular tower to obtain an updated time/date. The timezone within the Physical Analyzer forensic software was adjusted to reflect the known KGLT for Central Standard Time (CDT), with Daylight Savings Time enabled, as that was the timezone the device was utilized in.

(1) Analysis of the contacts identified 245 individual contacts associated to the device. All contacts are included for review by the requesting office.

(2) Analysis of the call logs identified 735 calls placed to/from the device. A subsequent review identified 245 incoming, 245 outgoing, and 245 missed calls as detailed in the extraction report were all the same.

(3) A complete extraction report of all identified artifacts on Exhibit 3 can be found [here](#).

d. Exhibit 3.1: At the request of the submitting office, three call record reports pertaining to Exhibit 3 were provided and subsequently combined and color coded into a single Microsoft excel workbook titled "[CDR Analysis](#)". The provided call logs were compared to the contact list identified during the analysis of Exhibit 3 and marked accordingly.

e. Exhibit 4: An analysis of Exhibit 4 disclosed the device was password protected. The provided password "NYMETS" unlocked the device and it was placed in "airplane mode" prior to analysis. The device was identified as a U.S. Government issued Blackberry, the phone carrier was AT&T, and the phone number was identified as (256) 682-8226. With the device being placed into "airplane mode" for examination, the device was unable to sync with a cellular tower to obtain an updated time/date. The phone was set Central Standard Time (CDT), with Daylight Savings Time enabled, which was consistent with the known good local time. A manual review of the device was conducted due to the device not being supported by current forensic tools and photographs of the [Contacts](#), [Call Logs](#), [Calendar](#), and [Emails](#) were captured to document what was present on the device. Analysis of the Call Logs identified the last recorded call was a missed call at 1:44pm, 29 Jul 16 from (866) 728-2098, the last incoming call was at 1:30pm from (256) 529-5608, and the last outgoing call was at 1:01pm, 28 Jul 16 to the Contact [\(b\)\(6\)\(b\)\(7\)\(C\)](#)

f. Exhibit 5: An analysis of the Memorex DVD-R which contained six Outlook Personal Storage Table (.pst) files pertaining to MG Rossi's email account from 2014 did not identify anything of evidentiary value.

*Note: .pst files are part of the Microsoft Outlook email platform that allows users store email, calendar events, and other items associated to their Outlook account.*

g. Exhibit 6: Analysis could not be conducted as the drive contained no data. This drive was created by the Redstone Network Enterprise Center (NEC), and reported to have contained a copy of the user profile for the "RossiJ" user account obtained from the NEC server.

h. Exhibit 7.1 & 7.2: Analysis of the Memorex DVD-R's which contained a copy of the user profile and .pst files of the RossiJ user. Subsequent analysis identified the following:

(1) Analysis of the associated emails identified two potential noteworthy emails contained within the "Fort Sill.nst" detailing a conversation MG Rossi had with his (b)(6)(b)(7)(C)

(2) No additional data was identified on the DVD's was identified to contain anything relevant to the incident under investigation.

4. **CONCLUSION.** The examination of Exhibits 1 through 5, and 7 provided conclusive information to link the devices to MG John Rossi. Numerous artifacts were identified to establish use of the devices; however, no information was identified to contain any information surrounding the circumstances leading up to MG Rossi's death. Analysis of Exhibit 6 could not be conducted due to the device containing no data.
